TABLE TOP CUP SEALING MACHINES

Mod. PLB-4S, POB-4S, POB-1S
output up to 12 PCs/min

At Pack Line, we manufacture a range of productive output, in order to enable the possibility of gradual growth in your production. The manual sealing models are the first stage in the range of filling and sealing machines for preformed containers. These models are usually used for testing new products or alternatively as a supplementary to a higher output machines. The machines are ideal for packaging wide range of products in containers sealed with pre-cut lids. Customized user friendly machines provide tight and reliable sealing.

List of available features and technical data:

User friendly sealing system with high quality result.

Can be easily adapted for different containers shape and sizes.

All product contact parts are stainless steel.
The machines are manufactured using stainless steel, anodized aluminum and plastic, all of which conform to EEC standards for food grade materials.

The machines include:
- moving platform
- heating press
- control panel including timer and thermostat

Method of operation:
- insert the cup into the socket of the movable platform and adjust the sealing time and the temperature
- place the lid on the top of the cup
- move the platform with the cup and the lid exactly to the position under the heating press
- according to the sealing time, the heating press starts to seal the lid onto the cup automatically (mod. PLB-4S. PLB-1S) or after pulling the handle (mod. POB-1S. POB-$S)

Technical data:

Power supply	230 V, 50 Hz	110V, 60 Hz
Contro voltage	24 V	24 V
Power installed	0.8kW	1 hp
Pneumatic feeding (for PLB-4S)	6-8 bar	90-120 psi
Net dimensions:		
PLB-4S, POB-4S	380x280x430 mm	15x11x17 inch
POB-1S	210x280x430 mm	8x11x17 inch
Net weight	25 kg	55 lb
Time per cycle	5-6 seconds	5-6 seconds
