

The Endoline 330 series of robotic machines are designed to fully automate the packing of products into cases, trays or crates on new or existing production lines and remove labour intensive operations, which are a major cause of cost and repetitive strain injuries. Its features are aimed specifically at customers seeking efficiency through simplicity in terms of set-up, operation and maintenance, which makes the 330 series a particularly cost effective investment.

Robust Construction

High quality components housed in a robust chassis ensure minimal servicing and enable 24 hour operation. Designed for the rigours of end-of-line packaging environments

Easy to Use

Simple operator controls for ease of use ensure the machine is available for the maximum

Compact

With surprisingly compact footprints these machines will fit in to area with restricted floor space

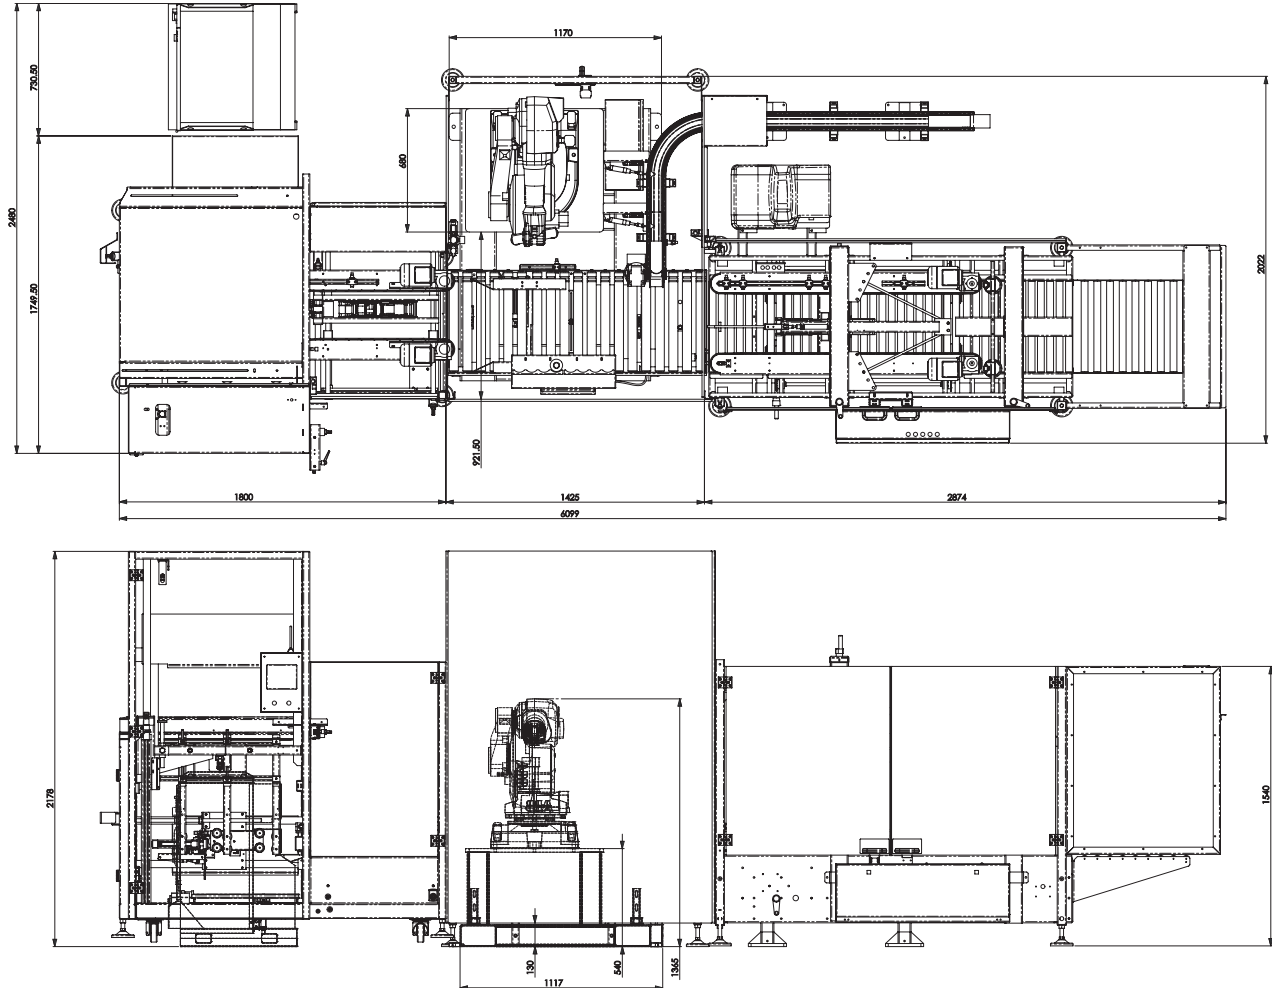

Clear Access

Clear access for easy cleaning and maintenance

330 Series
