

ARIBOX

**FLEXIBLE VERTICAL CARTONER
FOR INDIVIDUAL PRODUCTS**

Flexibility

Automatic size changeovers or size changeovers with assistance (products with different capacities).

Processing rate

Up to 200 products per min.

Products types

Bottles, small bottles and cylindrical or shaped containers.

Cartons types

Cartons with bottoms glued, clipped or with a clipped flap, fall-protection flap optional.

Technical characteristics

Ergonomy and access studied for the operator.

Continuous drive system.

Speed varies with product feed rate.

Positive and continuous carton opening system allowing heavy cardboard or complex shapes to be used.

Cartons support system without static guiding avoiding any friction on cartons surface.

Complete end of line solutions

ARIBOX may be connected to our range of case packers ARICASE VT and ARICASE LT, thus allowing the supply of complete cartoning and case packing lines.

Options

Production control.

Products orientation in the carton.

Leaflets applicator.

Operator graphic terminal providing production information, size changeovers and maintenance assistance.

Ink-jet or laser system integration.
