

NEW !!

ARITRAY

ROBOTIZED CASE PACKER

Flexibility

Single or sleeved products (cups, bottles, packs, ...)
Multisize configuration with automatic size changeover, one or several layers...
Possibility of placing items between layers (protection inserts, leaflets, gadgets...)
Possibility of sampling picking.

Processing rate

40 to 60 cases per min. depending on collations (for one or several trays in the same cycle).

Technical characteristics

Loading by a 4 or 6 axis robot
Static or dynamic products collating for unstable or sensitive products (mousse, multilayers, ...) with tracking as an option
Excellent ergonomics, maximum access due to the mechanical simplification of the machine
Operator terminal for monitoring assistance.

Full end of lines

ARITRAY may be connected to all ARIES PACKAGING sleeving machinery, to the junction and accumulations systems ARILINK as well as various robotized solutions for depalletization/palletization.

Optional supplies

Lane divider, mixing unit, turning device on machine infeed
Cases stacker on machine outfeed
Ink-jet or laser system, quality control (vision, checkweighing) system integration.
