

Wolverine Proctor & Schwartz Ltd

Small Capacity Compak Style Nut Roasters

For continuous processing of nuts, Wolverine Proctor & Schwartz is the largest manufacturer of nut roasters world wide.

As you investigate equipment for your processes you will find our name is synonymous with nut roasting.

With over 30 years of nut roasting experience, we have developed proven technology and with over 400 installations worldwide, global experience.

The small capacity compak nut roaster is available in four models and includes the following advantages:

- Improved operating efficiency with a continuous roasting process.
- Gentle product treatment reduces breakage, skins & coating loss.

- Maximum access for cleanability.
- Uniform roast due to superior air and heat distribution.
- Integral cooler stops roasting process at the optimum point.
- Processing flexibility allows a wide range of products to be processed on any one roaster.

The roaster can be designed to meet specific requirements, with construction in various amounts of stainless steel, starting from product contact parts only.

Various feed systems are available, including, hopper, and cross vibratory feeder as are various conveyor cleaning systems and fire suppression system.

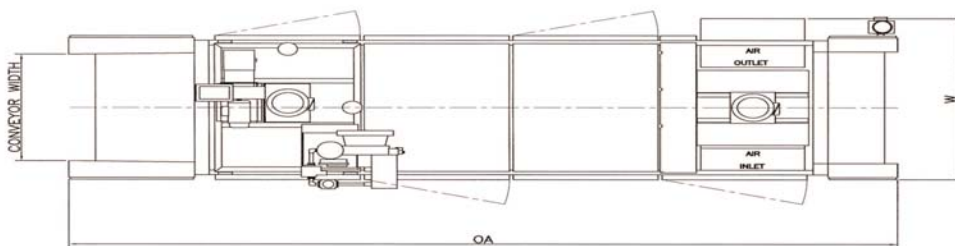

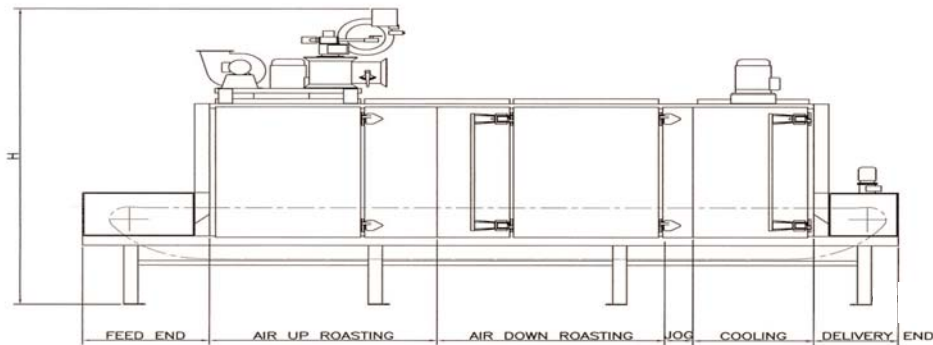

TYPICAL COMPAK STYLE NUT ROASTER CAPACITIES
