

# Complimentary Equipment

## Cup de-nester/Feeder

This highly efficient unit will de-nest cups and feed them onto a conveyor. It can be used for feeding a labeling machine or a shrink sleeve machine. The unit can come as a stand-alone or can be mounted on the conveyor itself.

## Feeding Table

Unique automatic table that feeds columns of cups into an elevator that takes them into the de-nesting unit.

## Cup collecting unit

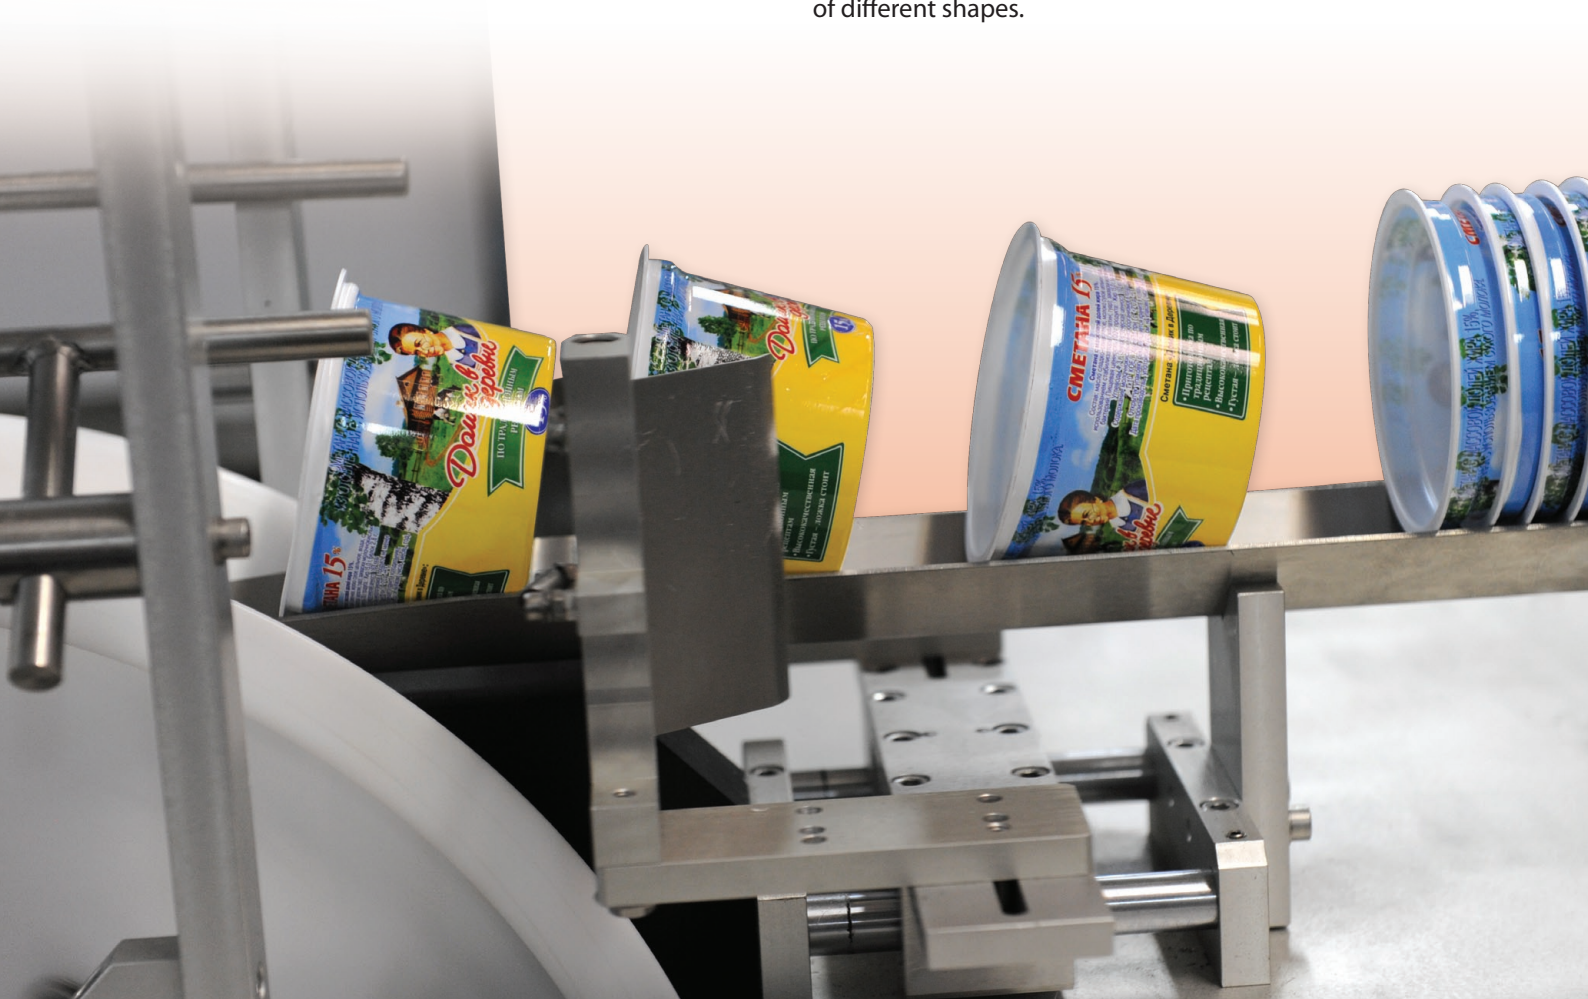

There are two basic types:

- High speed horizontal collector with vacuum wheel and adjustable cup quantity.
- Screw-type cup collector

## Bottle feeder

A specialized feeder equipped with a large hopper. An elevator takes the bottles from the hopper and feeds them into a specialized unit that orientates them and places them on a conveyor.

Feeders are also available for other products such as caps of different shapes.
