

OVERWRAPPING BACK TO **BASIC**

Are you a company that:

- is starting up business,
- has few different product dimensions,
- has little or no maintenance capacity,
- has a limited budget.

And are you looking for:

- reliability,
- efficiency,
- high quality wrap,
- a well established supplier,
- a user friendly machine,
- excellent Return On Investment.

Then Sollas has the solution for you:

The Sollas BASIC is the new approach in the Sollas strategy to supply the best possible overwrapping machines at the best price. With the Sollas BASIC concept it is truly back to basics. Sollas offers the machine with a 1.5 m infeed conveyor from the left or right hand side. The machine, which handles product in one level, is also provided with a servo film transport. This means that no manual adjustment of the film length is required. One set of product related change parts is standard delivered with the machine. If required Sollas can offer additional product related change parts against a low price and with the shortest possible delivery time.

Optional extras:

- Film slitting device
- Teartape device for self-adhesive tape
