oli Track & Trace for pharmaceutical products

Safe and uninterrupted tracking of medication

- » With the new Track & Trace system from oli, every packing unit receives one uniquely assigned code (serialization).
- » Every shipping carton is provided with a label containing detailed information about the content of the carton (aggregation).

oli Track & Trace for your packing line

- » The oli Track & Trace system has been developed together with strong partners (Laetus GmbH & Bluhm Systeme GmbH) and can be individually adapted to all customer specifications.
- » Even a combination with other, already existing systems or cooperation with other partners is possible.
- » Of course, already existing oli packing machines can be upgraded with Track & Trace.

» Individual product with encoding (serialization)

» Verification

» Carton filling by means of aggregation (olimat)

» Carton labelling and verification

» Palletization with aggregation (oli-pal)

» Pallet labelling

oli Track & Trace for uninterrupted tracking for pharmaceutical products

Why is Track & Trace so important for the pharmaceutical industry?

Medication and other pharmaceutical products are subject to a very high counterfeiting risk worldwide. This does not just impair the end users, but also health insurance companies and the pharmaceutical industry.

In the battle against product counterfeiting and tax fraud, uninterrupted tracking (Track and Trace) of the products is the prerequisite:

- » from production
- » through the entire packing and logistics line
- » to the pharmacy

oli Track & Trace systems are developed in cooperation with strong partner enterprises:

Laetus GmbH:

Specialist in the field of innovative quality and safety inspection systems

- » Camera systems, code readers and evaluation devices
- » Comprehensive software for data management

Bluhm Systeme GmbH:

Full-service provider of interbranch identification solutions

- » Labelling and lettering systems

Laetus and Bluhm are the preferred cooperation partners for developing oli Track & Trace systems.

According to customer requests, cooperation with other partners is also possible.

Individual packing solutions with Track & Trace systems:

oli Track & Trace systems can be integrated into all packing machines from oli:

- » Side loaders
- » Top loaders
- » Palletizers
- » Packing robots

Of course, upgrading already existing packing lines is possible as well.

oli Track & Trace guarantees complete production safety and transparency for the pharmaceutical industry.
