

Circular No. 469: PROBAT introduces all-new NEPTUNE 1000 drum roaster

Dear PROBAT agents and subsidiaries,

PROBAT is presenting the next generation of industrial drum roasters, the all-new NEPTUNE 1000. The roaster will be presented for the first time during a digital launch event on the PROBAT YouTube, Facebook, and LinkedIn channels, before it is released to the global market.

The forward-looking NEPTUNE 1000 is a perfect combination of flexibility and process safety, clad in an innovative hygienic design. With an extended roasting time range of 6 to 20 minutes and a batch size capacity between 110 and 220 kg, the new NEPTUNE 1000 provides maximum possibilities in creating recipes for any aroma development from light to highly intense. Equipped with high-performance cyclones and a recirculation system, the roasting machine also reflects the rapidly growing importance of sustainable processes for the sector.

The cleaning-friendly-designed parts and components of the NEPTUNE 1000 allow for simplified accessibility and easy maintenance, thus ensuring maximum availability of the roasting machine.

Furthermore, with an hourly roasting capacity of 1,000 kg, this drum roaster is a crucial and much-in-demand addition to the PROBAT drum roaster series as it bridges the gap between the Px 120 and the next larger NEPTUNE 1500 model with an hourly output of 500 and 1,500 kg, respectively. The NEPTUNE 1000 is the ideal solution for customers who plan to step up their processes.

Spread the word on the digital launch of this next-generation drum roaster via the **PROBAT YouTube, Facebook and LinkedIn channels on May 18, 2 pm CEST.**

If you have any questions or comments, please don't hesitate to contact us.

With kind regards,

Your PROBAT marketing team
